

# Electric Fence Warnings during the winter!

[www.granitestatedogrecovery.com](http://www.granitestatedogrecovery.com)

Please remember if your electric fence line is not buried into the ground a snow plow/snow shovel can easily take out your electric fence allowing your dog to escape. Always double check for breaks in your electric fences on a weekly basis.

In the Colder Weather old batteries in your dog's electric fence collars will not always work causing your dog to be able to bolt out of the fence line, always be sure you have working batteries in your dog's collars.
